

Read & Write 11 *(Gold Edition)*

HELP GUIDE

What is Read & Write 11?

Read & Write is a big confidence booster for anybody who requires a little extra support with their reading and writing.

This software is user friendly and provides features to help with anything from speech, writing and reading.

This software helps users with dyslexia as well as other learning difficulties.

How to find Read & Write 11

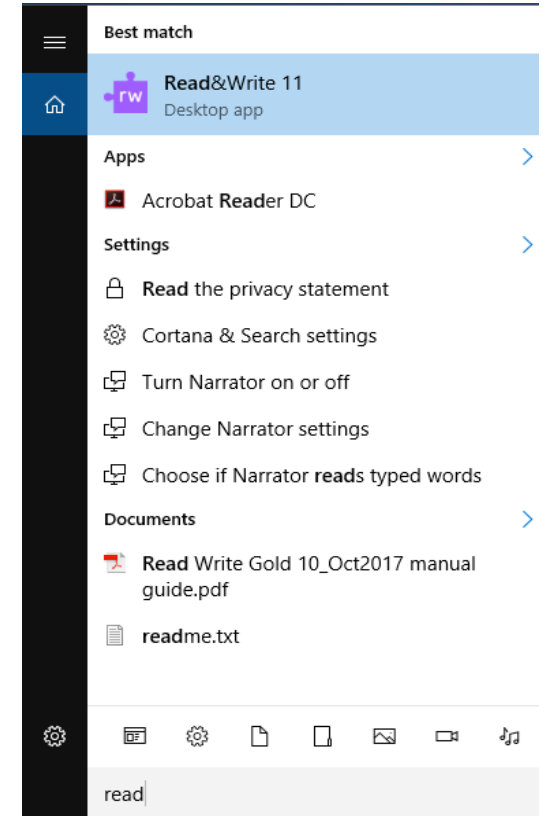

Read & Write 11 is installed onto all of the classroom PCs around the college.

This software is put onto the desktop.

However if you cannot find this please follow the below steps:

Click onto **Start** > start typing Read&Write and it will be the first result.

(please see screenshot)

Key Features

- Screen Masking
- Screenshot Reader
- PDF Aloud

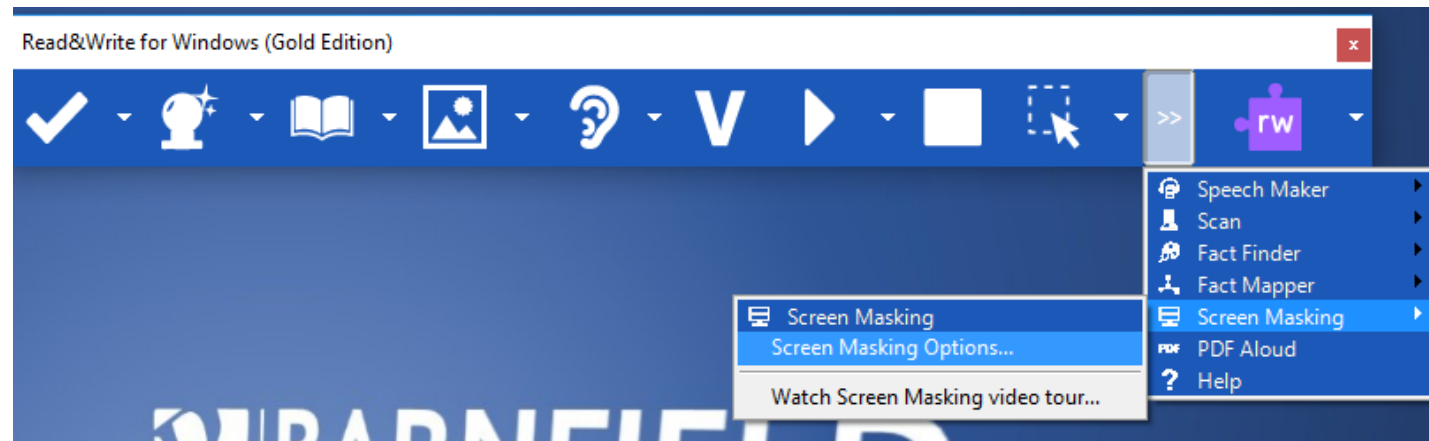

And many more!

Screen Masking

Screen masking allows you to ‘mask’ out areas of your screen as well as underlining text and changing the size/colour of the mouse pointer.

Within this feature you are able to personalize the settings to your requirements.

To find this feature please see screenshot below:

Screenshot Reader

Headphones are required for this feature.

Screenshot reader is a tool used to enjoy text to speech with simply highlighting a box around the images, documents, webpages, etc.

To access this, click on the  button.

Highlight the picture/text to draw a rectangle over the text you want read aloud.

To exit, click on the **X** button in the Screenshot Reader window.

PDF Aloud

Headphones are required for this feature.

PDF Aloud is a toolbar that will read text aloud from a PDF document.

To use this feature you need to open the PDF document.

Click on the play button from the Read & Write menu this will then begin to read the text aloud. Once you have finished click on the stop button.

Help

If you have any issues using this software please contact IT Support.

If you want to know more information on using this please contact Emily Willis.
